CURRENT COMMENT.

Prop. Lugger, state entomologist of Minnesota, has made a report on the grasshopper killing in Chicago county with the hopperdosers. Over 400 of these machines were at work and gathered in 8,000 bushels of grasshoppers daily.

THE government is going to make a speedy acknowledgment of the services of the late secretary of state by naming the new revenue cutter for the great lakes Walter Q. Gresham. It will be finished in one year and will be 205 feet long.

As a result of the big strike last summer, 122 claims, aggregating \$1,175,756, have been filed against the city of Chicago. They are made by railroads and other corporations, who assert their property was destroyed by rioters during the strike. The smallest claim filed, \$26, is in behalf of the Pullman Palace Car Co.

The national convention of deaf mute instructors recently held a most successful and harmonious convention at Flint, Mich. A resolution was unanimously adopted providing for the appointment of a committee to formulate a plan for the organization of a protective association among the deaf mute workers of the country.

THE visible supply of hogs in the United States is being considerably reduced by the packers and exporters. The Cincinnati Price Current reported 120,000 more hogs packed since March 1 than during the corresponding period of 1894. Exports of bacon and pork were reported to have increased in the same time over 11,000,000 pounds.

THE Iron Trade Review, of Cleveland, O., says: "With all wage scales settled, the iron trade enters upon the second half of the year with prospects of the heaviest summer output in years. Structural mills, plate and bar mills, east and west, are well supplied with orders and rail mills have a tonnage before them that is in decided contrast to their beggarly orders o year ago."

A FRENCHMAN proposes to set out for the north pole in a balloon. He argues that the polar circle is an ideal place for an air ship, as the temperature is even, the earth unobstructed by vegetation, the daylight unobstructed for six months, and electric discharges rare. The balloon is to be a very elaborate affair, and it will be provisioned for over 100 days. It will not start before July, 1896.

fized in the vicinity of Creston, Ia., by a smooth gang of piano swindlers. A salesman would call at a house and offer to leave a piano at the house for four months on trial, and say if four were sold in the vicinity he would present the instrument to the parties free. They asked no money, but requested the farmer to sign a card describing the piano, etc. It turned out to be a promissory note for \$480. The piano would not be worth over \$150.

THE effect of the Chicago drainage canal on lake levels is still under discussion. One of the leading engineers in charge of the work assured the secretary of war that the reduction of the lake level when the canal is taking its maximum of 10,000 cubic feet of water a second will never reach 6 inches, and that the average reduction throughout the year will not exceed 316 inches. So far as definite data have been submitted, it appears that the lakes will feed the canal without a change of any consequence in their levels.

A color organ has been invented, by means of which, as certain notes are struck, the melody is reproduced in a succession of color tones and combinations on a screen at the same instant they are heard by the ear. At a recent test in London Chopin's preludes were played, and the screen showed a succession of rhythmical waves of color, passing so rapidly that it was hard for the eye to take them all in. The instrument is the first in the world to show a definite connection between sound and color.

A RABBIT parliament has been held in Australia and four days were spent in considering proposed remedies for the overproduction of rabbits in those colonies. New South Wales once of fered \$125,000 for the best plan to keep down the rabbit pest, and though 2,000 schemes were submitted the meek little animal has triumphed, and roams over 7,000,000 acres of abandoned land it has conquered from the farmers. The parliament reached no conclusion except to recommend strong fences, and to transfer the suppression of rabbits from the state to private land own-

ARCHBISHOP KAIN, of St. Louis, has made a decision that removes the ban placed by some priests on Grand Army funerals and members of the G. A. R attending funerals may enter the church wearing their uniforms and insignia, and may conduct funerals in accordance with their ritual in Catholic cemeteries. Controversies on the subject have been frequent within the past few years, and many a cortege has been refused entrance to a church or cemetery by some priest because its members were the uniform and in signia of the order, on the ground that it was against the rules of the church.

J. L. Isenburg has returned to his home in Enid after an absence of tendays. In the columns of his paper the Enid Daily wave referring to the shooting affray in which Marshal Williams and Register Patterson of the land office lost their lives each by the hand of the other, he has the following:

"We are again at our post after an absence from the city of ten days, during which time we were in no mental condition to contribute anything to these columns and the time seems like an age to us, as we lingered on the borders of nervous prostration a greater part of the time. Our trouble was ever in mind like a horrible dream. It came on as unexpectedly as a loud clap of thunder in the night time; its fatal and sorrowful ending created within us a remorse and regret seldom experienced by man under like circumstances.

"No one outside of the near and dear relatives of our two unfortunate fellow citizens could possibly mourn their tragical demise more deeply than the spirit penning these lines, yet, conscientiously speaking, we cannot see where we are so much to blame as the harsh critical properties.

THE GREAT CORN CROP.

The Latest Estimate Gives an Enormous Yield in Kansas.

TOPERA, Kan., July 12.-People who have opportunities for knowing some-thing about the Kansas growing corn crop are increasing their estimates of the probable yield as harvest comes on apace. It is now estimated that 400,-000,000 bushels will not cover the yield. Conditions all over the state are perfect, and the crop is at least ten days

advanced over any previous year.

F. D. Coburn, secretary of the state board of agriculture, attended the opening of the Goodland irrigation plant this week, and made careful ob servation of the condition of the corn-crop across the state from east to west. Mr. Coburn is always conservative in his estimates of crop conditions, and the following statements, which he made in an interview, are thoroughly

reliable: "The corn crop from the Missouri to the west line of the state is surely as promising as it well could be at this time of year—so much so that with such an immenre acreage its probable yield is like Kansas' underground water supply, beyond calculation. Crops everywhere are also in prime condition, and, of course, live stock is

thriving wonderfully." "Did you notice much damage to crops and property by the recent heavy rains and high water?"

"No; going by the Union Pacific and returning by the Rock Island, I did not see ten acres all told that had been injured by too much rain. Washouts on the latter road in Norton and Decatur counties have caused great damage, but trains are being run through again all right."

Kensas Prison Board LEAVENWORTH, Kan., July 12.—At a meeting of the new republican board of directors of the Kansas penitentiary yesterday, James Hamilton, of Crawford county, was appointed superin-tendent of the prison coal mines; ex-State Senator John Kelley, of Wichita, was made weigh clerk, and H.
